INTERNSHIP EXPERIENCE :-

Full Stack Developer Intern

Full Stack Developer Intern – InterviewDesk 2025 july- 2026 April

- Video Transcription & Live Interview System** : enhanced a real-time speech-to-text transcription system using AssemblyAI and AWS to capture live conversations during video interviews. executed speaker identification to accurately distinguish between interview participants, enhancing clarity and usability of transcriptions. streamlined video interview functionality using Agora by improving camera layout and recording stability, ensuring a seamless user experience. Additionally, ensured reliable capture and storage of live conversation data for future analysis and review.
- AI-Powered Chat Application** enhanced a real-time role-based chat application enabling seamless communication between users, interviewers, and internal teams by integrating Ably for low-latency messaging. executed message persistence and chat history tracking using backend APIs and database integration to ensure reliable data storage. Designed a scalable architecture supporting multi-user concurrent communication, improving system performance and responsiveness. Enhanced user experience with a responsive and interactive UI built using React and Ant Design.
- AI Chatbot for Interview Assistance** enhanced an AI-powered chatbot designed to assist interviewers by generating relevant interview questions in real time based on candidate profiles and job roles. Enabled functionality for interviewers to input code snippets during live sessions, allowing the system to analyze issues and suggest targeted technical questions. Improved the interview process by providing intelligent prompts, identifying problem areas in candidate responses, and helping interviewers conduct more structured and effective evaluations.
- Campus Admin Application (Assessment & Course Management)** Revamped a Campus Admin Application used for managing tests, assessments, and courses by enhancing core functionalities and system performance. Designed and improved admin dashboards with data visualization and analytics features to enable better decision-making. Built dynamic data entry forms and management modules using Next.js, React, and Ant Design for a seamless user experience. enhanced scalable backend services using AWS Lambda-based microservices architecture for efficient data handling. Additionally, improved UI/UX across multiple modules, significantly increasing usability and overall application performance.
- Improved backend and platform features including resume parsing accuracy**, AI-based candidate feedback summarization, onboarding enhancements, and UI fixes across multiple modules.

Full Stack Developer Intern

Veyyil Robotic PrivateLimited, Remote Jan 2025

- Engineered an advanced data analytics framework within the **Emission Tracking project**, resulting in the identification of key emission reduction strategies that projected a 20% decrease in overall greenhouse gas emissions.
- enhanced frontend** features using Next.js, React, and Ant Design, including data entry forms, dashboards
- Built and integrated backend APIs using Python Flask, connected to a PostgreSQL database.

EDUCATION:-

MCA-Master Of Computer Application Kongu Engineering College, Perundurai Anna University.	2023 - 2025
BCA-Bachelor of Computer Applications Sasuri College Of Art and Science. Tiruppur Bharathiar University.	2019 - 2022
CT-Computer Technology Kongu Polytechnic College, Perundurai	2016 - 2019
SSLC Sakthi Vigneshwara Kalvi Nilayam Higher Secondary School	2015

CERTIFICATIONS COMPLETED:

- Completed Python certification
- Completed React certification in DevTown

LANGUAGES KNOWN:

- Tamil - Native
- English - Proficient

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Continuous Learning
- Time Management
- Adaptability

SKILLSET:

WEB DEVELOPMENT:-

- **MERN Stack:** MongoDB, Express.js, Node.js, ReactJs
- **Frontend Technologies:** HTML5, CSS3, Tailwind CSS

PROGRAMMING LANGUAGES :-

- **Java Script:** DOM Manipulation, Async/Await
- **JAVA:** Intermediate (OOP concepts, basic syntax)
- **Python :** Basics (OOP concepts, basic syntax)

DEVELOPMENT TOOLS :-

- **Code Editor:** Visual Studio Code
- **Version Control:** Git, GitHub

DATA BASE :-

- Sql
- MongoDB

ACADEMIC PROJECTS:

Academic Resources Hub Web Application --- MERN Stack:-

enhanced a full-stack web application that provides students with access to academic resources such as syllabi, question banks, e-books, and certification courses, along with quiz-based knowledge assessment. executed features to foster collaboration by enabling students to connect with peers skilled in specific subjects, while also supporting personalized course preferences to enhance the learning experience. Designed admin functionalities for managing users, creating and maintaining quizzes, and adding academic content. Built student modules including secure authentication, resource downloads, YouTube-based learning integration, and curated website recommendations. enhanced the frontend using React.js with Context API and modern hooks for state management, and built scalable backend services using Node.js, Express.js, and MongoDB with JWT-based authentication and secure password handling.

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Axios, Context API

GitHub: <https://github.com/Vmkmanoj/Academic-Resources-book.git>

E-Commerce Web Application --- MERN Stack:-

enhanced a full-stack e-commerce platform that streamlines product browsing, purchasing, and inventory management for both customers and administrators, reducing operational inefficiencies by 50%. executed secure authentication and role-based access for customers and owners, enabling features such as product management, order tracking, inventory control, and order categorization. Built a responsive and dynamic frontend using React.js with Context API and hooks for efficient state management, while integrating RESTful APIs for seamless data flow. enhanced a scalable backend using Node.js and Express.js with MongoDB for database management, incorporating JWT-based authentication and secure password handling. Ensured smooth user experience with streamlined API performance and structured application architecture.

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Context API, Axios
