PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of internship experience building AI-integrated web applications, real-time systems, and scalable MERN stack platforms. Proven ability to deliver production-grade features including live video transcription, role-based chat, AI chatbots, and e-commerce platforms. Seeking a developer role to contribute to impactful products in a fast-paced team.

INTERNSHIP EXPERIENCE

Full Stack Developer Intern

Jul 2025 – Present

InterviewDesk — Remote

- Built a real-time speech-to-text transcription system using AssemblyAI and AWS, capturing live video interview conversations with accurate speaker identification for 100+ interview sessions.
- Developed a role-based AI chat application integrating Ably for low-latency messaging, supporting 200+ concurrent users with message persistence and chat history via backend APIs.
- Implemented an AI-powered interview assistant chatbot that generates contextual technical questions in real time based on candidate profiles, reducing interviewer prep time by ~40%.
- Revamped a Campus Admin Application with data visualization dashboards, dynamic forms, and scalable AWS Lambda microservices, improving page load performance by 30%.
- Improved resume parsing accuracy, AI-based candidate feedback summarization, and onboarding workflows across multiple platform modules.

Full Stack Developer Intern

Jan 2025

Veyyil Robotic Private Limited — Remote

- Engineered a data analytics framework for an Emission Tracking project, identifying key reduction strategies that projected a 20% decrease in overall greenhouse gas emissions.
- Developed responsive frontend dashboards and data entry forms using Next.js, React, and Ant Design.
- Built and integrated backend REST APIs using Python Flask connected to a PostgreSQL database.

PROJECTS

E-Commerce Web Application — MERN Stack

[GitHub](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Context API, Axios

- Built a full-stack e-commerce platform with product browsing, cart, order tracking, and inventory management, reducing operational inefficiencies by 50%.
- Implemented JWT-based authentication with role-based access for customers and admins, covering product management and order categorization.
- Designed a responsive React.js frontend with Context API for state management and RESTful API integration for seamless data flow.

Academic Resources Hub — MERN Stack

[GitHub](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Axios, Context API

- Developed a platform providing students with syllabi, question banks, e-books, and certification courses with quiz-based assessment.
- Built peer-connection features enabling students to collaborate with subject experts, and integrated YouTube-based learning modules.
- Designed admin dashboard for user management, quiz creation, and content moderation with secure JWT authentication.
